

# Dadex T-flex Pipes Compressed Air Application

## Why T-Flex Pipes for Compressed Air Application:

- **Resistant to Corrosion:**

T-flex pipe does not corrode over time. Its premium polyethylene grades resist corrosion and blockage of air jet nozzle, adding durability and design life for an extended period compared to traditional steel / metal pipes.

- **Water Resistant to contaminated Sub-soils:**

T-flex pipes do not rust or rot as a result of under ground leaching. They remain unaffected when buried under soils that are acidic, alkaline, corrosive or saline in nature.

- **Cost Effective & maintenance Free:**

T-flex pipe does not require external wrapping and cathodic protection, generally needed for metal pipes to prevent corrosion, making it a cost effective and maintenance free solution.

- **Extendable connections:**

T-flex like other piping systems have the provision of flanged connections. It can be connected to metallic manifold above ground.

- **Customer Focus:**

Dadex works around 3 steps formula in which we offer pre sales, during sales and post sale services to our customer.
